Data Transmittal

TO: R. Gilman, J. LeRose		**DATE:** 3 October, 2002
FROM: C. J. Curtis	**Checked:**	**# :** A818

DETAILS:

Below are the results from the superharp survey carried out on September 19th, 2002. The values represent the difference in millimeters from the ideal position of each fiducial. A positive X value is to the beam left, a positive Y is too high.

Superharps

	DX	**DY**	**locations in mm (+ is beam left)**
SH1H01A	0.28	0.18	
SH1H01B	0.39	0.17	
SH1H01C	0.36	0.17	
SH1H02A	-0.10	-0.03	
SH1H02B	-0.07	0.08	
SH1H02C	-0.05	0.05
