

Coordinate Detector Update

- Commissioning in progress
 - Module 2 second half about to start.
 - Now in possession of all the required NINO cards
- Completed cosmic data taking for first half of module 2
 - Charge normalization, thresholds and crosstalk analyzes complete; efficiencies next.
- Starting to prepare module 3 for cosmic testing
 - Install PMTs; make light tight; install NINO cards

Coordinate Detector Update

- Engineering design work for mounting the detector now in progress
- Previous CDet CAD model incorrect
- Derek Henley working on updating and correcting the CAD model based on the actual measurements of the modules
- Considering ideas on how to mount the modules including the process of doing so.
- Considering how to mount/route all cabling on the frame/detector as well.
