1) Gordon - 3He targets.

Nilanga asked is there a possibility that AIn will run next couple of years? Gordon said that it might run really soon. It may run in Hall-C with one arm. If we run in Hall-C we will not get full performance. If we run Hall-C we can build shorter metal end windows so the experiment can run with higher current ~40 uA.

3) Bogdan - ECal status and milestones.
