
Minutes: SBS Meeting February 24, 2016

Agenda: Alexandre - Possible parasitic measurement during Fall Gmp run
Nilanga - GEM detectors for Super BigBite

Attendees: Brian Quinn, Gregg Franklin, John Annand, Evaristo Cisbani
Mark Jones, Mitra Shabestari, Dasuni Adikaram, Kieran Hamilton,
Peter Monaghan, Albert Shahinyan, Andrew Puckett, Kondo Gnanvo,
Nilanga Liyanage, Alexandre Camsonne.

Alexandre - Possible parasitic measurement during Fall Gmp run

- DVCS setup
- DVCS calorimeter box and carriage
- Gmp experiment requirements and existing limitations
- Possible Gmp kinematics
- DAQ options
- Instrumentation tests:
 - GEM tests
 - GRINCH prototype test
 - HCAL test

Nilanga - Update on GEM detectors at UVA

- 24 modules completed and fully tested, 22 modules OK and problems with 2 GEMs
- Modules #25 and #26 are complete and being prepared for testing
- Modules #27 and #28 under construction
- Issue with the uniformity of the GEM foils discovered at CERN
- The production of GEM foils is suspended at CERN until the issue is resolved
- UVA has enough readout foils to finish modules #28 and #29.
- Large order of electronics to EES is in progress. it is taking more time due to the size of the order.
