A Status Report of E00-007

Recoil Proton Polarization in $d(\gamma, \vec{p})n$ Reaction

Xiaodong Jiang

Rutgers University

December. 11, 2003 @ Hall A meeting

- The experiment.
- Status of analysis.

Summary:

- Data analysis of E00-007 was stopped for a few months.
- Analysis has been re-started, Dr. Xiaodong Jiang takes over the responsibility.
- The first time Hall A switch to the G0 helicity scheme. Not 100$\%$ sure about the helicity recorded in the data stream. This might screw up C_x, C_z analysis, and ep elastic calibration data.
- E00-107 is off the book.
