

FRONT VIEW  
Scale : 1:3

BEWARE : signal drillings are NOT directly centered on the strips. They are centered by group of 8. So there is a gap between each group of 8 signal drillings.  
For example here, gap of 46,1mm between each group of 8 signal drillings with 42,5mm pitch (see detail A).  
Same kind of comment on ground drillings.
