

# Vic's design for Ecal module back support

Threaded rods go through whole module and the 49-mm spacer (only the two ends need the thread)

Round support

[SOLID-1-4.pdf](#)

49-mm spacer

[SOLID-1-7.pdf](#)

75-mm spacer

[SOLID-1-8.pdf](#)

Hexagon support

[SOLID-1-3.pdf](#)

## Note:

1. For prototyping, can modify the round support (drawing file SOLID-1-4.pdf) to accommodate the actual fiber holder.
2. Eventually, the round support (SOLID-1-4.pdf) needs to be modified to accommodate the DDK connectors.
3. For prototyping, if cannot find threaded rods that are long enough, can use shorter rods. (?)
