Optics Status Update

Chao Gu
Calibration

- Still working on the optics of RHRS, will give a report after finished

- A problem
  - the sieve hole (7, 6) has a bad dp distribution which we could not identify the reason
1.7GeV, 2.5T, dp = -3%
Tg th vs. Tg ph

dp in col 7 row 6

Entries 5476

dp in col 6 row 6

Entries 3673
1.7GeV, 2.5T, dp = +3%

Tg th vs. Tg ph
