DOCUMENT ID:

**3310 Appendix T2  
Operational Safety Procedure Form**

**Serial Number:**

(Assigned by ESH&Q Document Control x 7277)

**1. Purpose of the Procedure**

The intent of this procedure is to provide instruction for authorized personnel to safely operate, service, and troubleshoot the Big Bite Power supply.

**2. Scope – include operations, people, and/or areas where procedure applies**

The use and safe operation of the Big Bite power supply to provide power for the Septum magnets.

**3. Description of the Facility: (include floor plans and layout of a typical experiment or operation)**

Water cooled 1050 amp, 240 volt DC power supply.

**4. Authority and Responsibility:**

**4.1 Who has authority to implement/terminate**

Jack Segal  
Ed Folts  
Howard Smith  
Heidi Fansler  
Jessie Butler

**4.2 Who is responsible for key tasks**

Jack Segal  
Howard Smith

**5. Who analyzes the special or unusual hazards (See ES&H Manual Chapter 3210 Appendix T1 Work Planning, Control, and Authorization Procedure)**

Ed Folts.  
Howard Smith.  
Jack Segal.

**6. Personal and environmental hazard controls including:**

**6.1 Shielding**

None

**6.2 Interlocks**

DOCUMENT ID:

**3310 Appendix T2  
Operational Safety Procedure Form**

**Serial Number:**

(Assigned by ESH&Q Document Control x 7277)

Due to the need to drive each coil set on the septum independently, both the HKS and Big Bite power supply faults will be interlocked together back to EESSAF to prevent beam steering problems.

- Platform Gate access interlocks
- Septum magnet temperature interlocks
- HKS and Big Bite power supply faults interlock
- Magnet coil temperature interlocks
- Emergency Stop interlocks

**6.3 Other**

**7. Monitoring systems**

Once the Big Bite power supply has been enabled the power supply can be controlled and monitored locally; or remotely with the EDM GUI.

**8. Ventilation**

- LCW (Low Conductivity Water)
- Free Air (fans integral to the power supplies)

**9. List of safety equipment (i.e: personal protective equipment or special tools)**

- Locks and Tags
- Safety Glasses
- VOM Meter
- Necessary Arc Flash attire

**10. Associated administrative procedures**

Log all work done in the Hall A online log, the halog webpage

**11. Operating guidelines**

Power supply should be operated within manufacturer's guidelines and agreed upon limits set for experiment.

**12. Notification of Affected Personnel (How and Who)**

Use the Hall A Tech on Call procedure.

**13. List of steps required to execute the procedure from start to finish.**

<b>Jefferson Lab</b> Thomas Jefferson National Accelerator Facility	<b>TITLE:</b>	<b><u>ES&amp;H Manual</u></b>
<b>DOCUMENT ID:</b>	<b>3310 Appendix T2</b> <b>Operational Safety Procedure Form</b>	

**Serial Number:**

(Assigned by ESH&Q Document Control x 7277)

<b>Author:</b>	Howard W Smith				
<b>Date:</b>		<b>Task #:</b> If applicable		<b>Frequency of use:</b>	Periodically
<b>Complete all information. Use as many sheets as necessary</b>					
<b>Task Location:</b>	Hall A		<b>Task Title:</b>	Big Bite power supply operation and troubleshooting.	
<b>Division:</b>	Physics		<b>Department:</b>	Hall A	
<b>Lead Worker:</b>	Howard Smith				
<b>Mitigation already in place:</b> <b>Standard Protecting Measures</b> <b>Work Control Documents</b>		All exposed 480 and 120 volt AC and DC current shielded in control cabinet.			

Sequence of Task Steps	Task Steps/Potential Hazards	Consequence Level	Probability Level	Risk Code (before mitigation)	Proposed Mitigation (Required for Risk Code >2)	Safety Procedures/ Practices/Controls/Training	Risk Code (after mitigation)
1	Electrical	High	Low	3	Follow Jlab Electrical Policy.	Lock Tag and Try	0
2	Work in low voltage (controls) section of the Big Bite power supply	Low	Low	1	Follow equipment operation manual	Proper PPE in accordance with this procedure. Equipment specific training	0

**Highest Risk Code before Mitigation: 3**

**Highest Risk Code after Mitigation: 0**

When completed, if the analysis indicates that the Risk Code before mitigation for any steps is "medium" or higher (RC ≥ 3), then a formal Work Control Document (WCD) is developed for the task. Attach this completed Task Hazard Analysis Worksheet.

**Serial Number:**

(Assigned by ESH&Q Document Control x 7277)

- LCW.
  - Septum Magnet or Big Bite Magnet
  - Big Bite power supply

**2. Analyze Hazard**

See attached THA.

**3. Develop and implement Hazard controls**

- List of PPE
  - Safety Glasses
  - Locks and Tags
  - Appropriate Arc Flash PPE.
- Identify danger zones
  - Immediate surrounding area.
  - Target access platform.
  - Arc Flash Hazard
- Training required
  - Lock Tag and Try (SAF 104).
  - Electrical Safety (SAF 603A).
  - Fire Prevention (SAF 603N).
  - CPR (SAF 105).

**4. Perform work within controls**

- Number of people needed
  - Two Electrically Certified workers should be present when locking and tagging out equipment.
- Verify that needed training is complete and current
  - Persons working on or about the Big Bite power supply must have appropriate Jefferson Lab training to be an Electrical Worker.

**Commissioning Procedure**

- Perform pre-job briefing (*1st step*).
- Ensure that all electrical connections are torqued properly.
- Make sure that there is adequate LCW pressure (120PSI) and flow.
- Verify voltage and phase rotation of main power.
- Check for and clear all internal power supply faults.

**Serial Number:**

(Assigned by ESH&Q Document Control x 7277)

- Confirm that the power supply can be controlled locally.
  - Authenticate remote communications to power supply.
  - Insure that all external faults (interlocks) are functioning properly.
  - Validate voltage and current stability.
- Post job briefing and cleanup  
*Follow procedure*

**Operating Big Bite power supply.**

1. Before operating the power supply one must read and understand this document and complete training on power supply operation by Hall A technical staff.
2. Read and sign conduct of operation for G2P experiment.
3. Check with Hall A work coordinator to verify that the Big Bite power supply is operational.
4. Ensure that it is safe to operate power supply by communicating with all affected personnel working in the general area around the Septum magnet and Target.
5. Verify that all access gates leading to Septum magnet/Target platform are closed.
6. Using the GUI for the Big Bite power supply, turn on the power supply and reset to clear faults; if faults do not clear a manual reset will have to be initiated by depressing the E-Stop button.
7. If faults still do not clear, inform the Hall A Techs (*Tech on call procedure*).
8. Set desired current needed for operation. (There are two modes of controlling the Big Bite power supply output current in software; through individual current settings or by setting the momentum. Additionally, do not adjust current while taking beam, only a Primary Spokesperson can authorize current changes while taking Beam. )
9. Power supply must be operated within the agreed upon parameters set by **Primary Spokespersons**.
10. For any issues concerning Septum magnet refer to Septum magnet OSP.

**5. Provide feedback and continuous improvement.**

*Document any mistakes, corrections, changes and pictures and implement changes. Turn in feedback to Hall work coordinator*
