

RC Report for 2/25 – 3/3

Luke Myers

Hall A Meeting

Wednesday (2/25)

- MCC: no beam for at least one week
- HCO in hall is complete. Ready to lock up.

Thursday (2/26)

- SNOW! (You may have noticed.)

Friday (2/27)

- Snow! (But this time we came to the lab.)
- Recovery from snow

Saturday/Sunday (2/28, 3/1)

- MCC begins work on :
 - 3-hall setup for injector
 - 750 MHz separator commissioning
- (neither gets too far on weekend)

Monday (3/2)

- Accelerator work continues

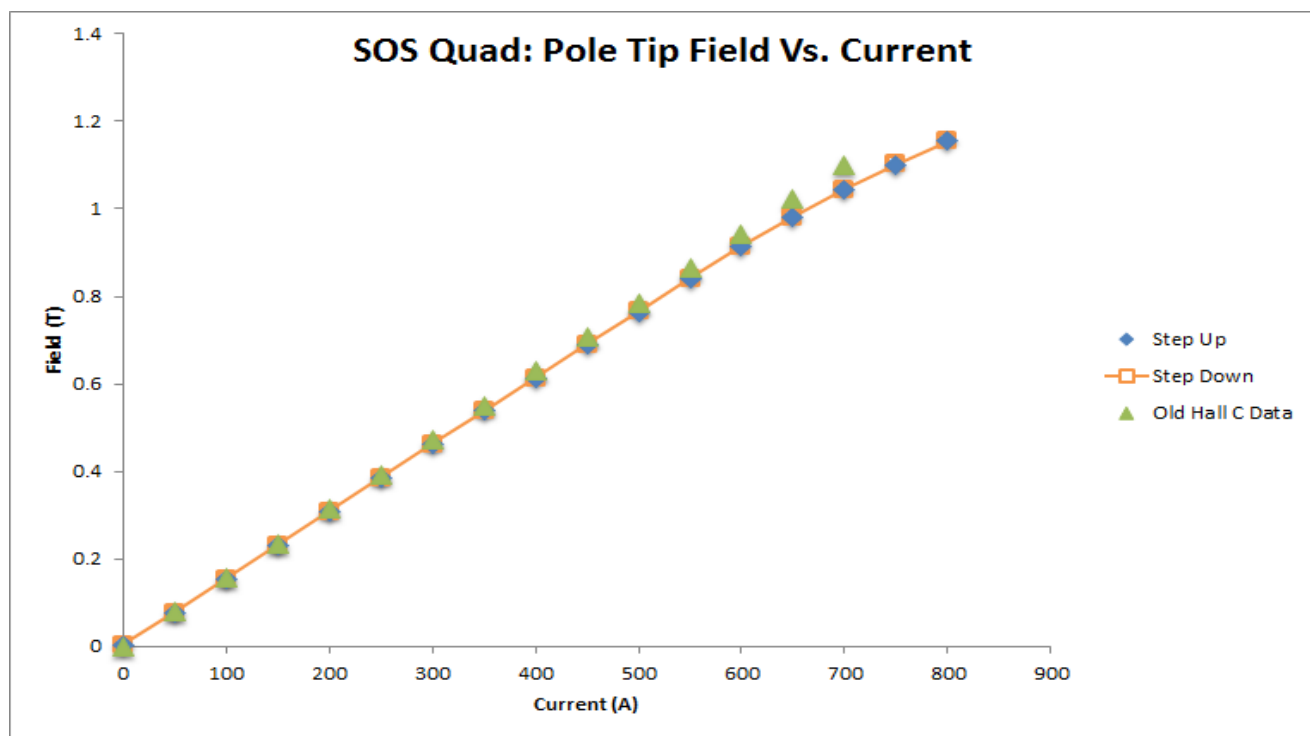

Tuesday (3/3)

- Beam *possibly* to Hall A by end of week. Stay tuned.

Experiment Preparations

- HRS readiness
 - LHRS fastbus (TDC repair and add fan)
 - Wide pedestals on some ADC channels
 - Generally ready for beam
- Shift sign-ups
 - most shifts have one crew member
 - more needed if we want to do something with beam
- Cryotarget training Thursday, 3pm in F224/225
- Safety documents in yellow binder. Read & sign.

Good news events

New RQ1 (SOS)

- EPICS BCM logger fixed
- Digital BCM receivers are ready
 - SM Fiber installed in Hall this morning, should get MO frequency direct from counting house
- Compton pump-down going. Ready by tomorrow?
