

Ordering

The required voltage rating may be defined by substituting the appropriate voltage code number (see table 1.) into the type number in place of the "x" symbol, see type list. When phase control thyristors are supplied with critical dv/dt other than 200V/ μ sec an additional code (see table 2.) is appended to the type number.

Examples

N018RH12 : 1200 volt device with standard 200V/ μ sec critical dv/dt

N105PH12H00 : 1200 volt device with 400V/ μ sec critical dv/dt
