

WHISPER™ Series

LOW PRESSURE DROP MASS FLOW METERS AND CONTROLLERS

*100 ms control
response*

*Incredible
sensitivity*

*Measurable flow from
0.0005–1000 SLPM*

*Ready-to-ship
inventory*

*Pressure drops
as low as 0.07 PSI*

Invisible Flow Measurement

WHISPER™ Series

LOW PRESSURE DROP MASS FLOW METERS AND CONTROLLERS

*Nearly invisible flow measurement and control
for minimal system impact*

Making You Faster

- <1 ms sensor response time
- 30–150 ms control response:
stills upstream fluctuations
- Instant-on: ready in <1 second
- All flow data visible on one
screen (flow, pressure, temp)
- Controller PD or PD²I valve tuning
for best speed and stability
- Digital and analog outputs

Common Options

- Bidirectional Flow Calibration
enables full-scale readings
in both flow directions
- Integrated Flow Totalizer
provides cumulative readings of
total quantity flowed over time
- Downstream Valve optimizes
control in vacuum conditions or
backpressure applications
- Backlit Color Display
shines in low lighting
- CSA Class 1 Div 2 (ATEX Zone 2)
Classification permits operation
in hazardous environments
- Industrial communications:
EtherNet/IP, DeviceNet, PROFIBUS,
Modbus, or EtherCAT

Controllers

- Control flows for leak testing
or anywhere you need to
maintain system pressure

Meters

- Monitor flows near
atmospheric pressure

Portable Meters

- Easy, no-impact flow
verification instantly!
