CABLE SAFETY

Cable Stand

Description

The Heavy Duty Cable Stand is the ideal product for keeping wires, cables and hoses off the floor. The Cable Stand keeps cables up from the ground to create passageways for personnel and vehicles and can be placed anywhere without the need of tools for installment or securing the stand on the ground. The top is used to suspend the cables off the floor. The pole can be extended up to 2.5 meter. However in that case the base needs to be stabilized with sandbags for example. The lead grip can hold up to 8 electrical leads and two hoses and is made of reinforced steel, rubber feet and powder coated.

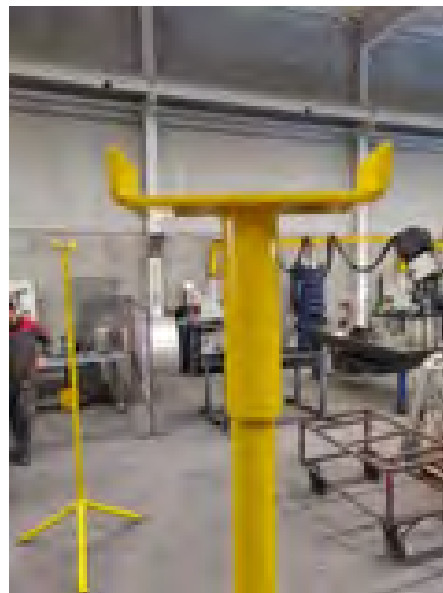

MODEL	CHARACTERISTICS
Individual Cable Stand	<ul style="list-style-type: none"> • Holds up to 250 kg / 550 lbs • Weight: 13.5 kg / 29.5 lbs • Comes in three parts <ol style="list-style-type: none"> 1. A base: width 100cm / 3 feet 2. Extendable pole with two levers min height 150 cm / max height 250 cm 3. The lead grip: width 35 cm
