DUPONT™ KAPTON® HN

POLYIMIDE FILM

DESCRIPTION

DuPont™ Kapton® HN general-purpose film has been used successfully in applications at temperatures as low as -269°C (-452°F) and as high as 400°C (752°F). HN film can be laminated, metallized, punched, formed or adhesive coated. Kapton® HN is the recommended choice for applications that require an all-polyimide film with an excellent balance of properties over a wide range of temperatures.

APPLICATIONS

- Mechanical parts
- Electronic parts
- Electrical Insulation
- Pressure sensitive tape
- Fiber optics cable
- Insulation blankets
- Insulation tubing
- Automotive diaphragms sensors and manifolds
- Etching
- Shims

PRODUCT SPECIFICATIONS

Kapton® HN is manufactured, slit and packaged according to the product specifications listed in H-38479, Bulletin GS-96-7.

CERTIFICATION

Kapton® HN meets ASTM D-5213 (type 1, item A) requirements.

DIMENSIONAL STABILITY

The dimensional stability of DuPont™ Kapton® polyimide film depends on two factors–the normal coefficient of thermal expansion and the residual stresses placed in the film during manufacture. The latter causes Kapton® to shrink on its first exposure to elevated temperatures as indicated in the bar graph in **Figure 1.** Once the film has been exposed, the normal values of the thermal coefficient of linear expansion as shown in **Table 4** can be expected.
