

FP-301VW Tubing

Flexible Polyolefin

Data Sheet

Product Description

3M™ FP-301VW Tubing has the same outstanding balance of electrical, physical and chemical properties as FP-301 Tubing and is specially engineered for superior flame resistance.

FP-301VW Tubing meets MIL-DTL-23053/5, Class 3 requirements. It is UL Recognized and CSA Certified at 600 volts @ 125°C (UL File Nos. E-39100, VW-1 and E-69751; CSANo. 38227, OFT).

FP-301VW Tubing is rated for continuous operation from -55°C (-67°F) to 135°C (275°F) and withstands elevated temperatures to 300°C (572°F) for brief periods. Minimum shrink temperature for all FP-301VW Tubing is 100°C (212°F).

Typical Applications

FP-301VW Tubing is ideal for fire-resistant coverings of components and flammable wire assemblies.

Shrink Ratio

FP-301VW Tubing has a 2:1 shrink ratio. When freely recovered, the tubing will shrink to 50% of its as-supplied internal diameter. The recovered wall thickness of the tubing is proportional to the degree of recovery. High expansion ratios are available subject to factory quotation.

Standard Colors

FP-301VW (flame retardant)—black, white, red, blue and yellow.

Standard Packaging

Four-foot lengths or large spools. Cut pieces available subject to factory quotation.

Ordering Information

Order FP-301VW by product name, size equivalent to expanded inside diameter, package type and color. Always order the largest size that will shrink snugly over the item to be covered.

Example: FP-301VW, 1/4", 4 ft., white.
