EA2000 Equalizing Amplifier
HALF-DUPLEX, COAXITRON® CONTROL

Product Features

- 120 or 230 VAC Input (For Wall Transformer)
- For use with Coaxitron® Control Systems
- Solid-State Circuitry
- For Post-Equalization Applications Only
- Desktop or Rack Mount

The **EA2000** is a half-duplex video/control equalizing amplifier intended for, but not restricted to, use with Pelco's Coaxitron® controls.

The **EA2000** provides a low cost, highly effective means of maintaining CCTV picture quality in runs of up to 3,000 feet (914 m) of RG59 coaxial cable and also maintains the quality of the Coaxitron control signal. Through panel controls provide for adjustable amplifier flat gain of 1–8 dB, plus adjustable high frequency boost of from 0 to greater than 18 dB at 12 MHz, maintaining full video amplitude, contrast and detail.

The **EA2000** features all solid-state circuitry and is supplied with a UL listed wall transformer.

Applications of the **EA2000** should be for post-equalization only (located near the monitoring equipment); use as a pre-equalizer is discouraged.

Three units can be rack mounted using the R300 rack mount kit, or two units can be mounted side-by-side in one chassis using the DT200 dual desktop mount kit.
