Number-System Modes

-
- 3rd** [DEC] Selects decimal mode.
-
- 3rd** [BIN] Selects binary (**BIN**) mode and converts the integer portion of the displayed number. You can enter positive binary numbers as large as 111111111 (9 digits). Numbers beyond this are interpreted as negative (2's complement) numbers.
-
- 3rd** [OCT] Selects octal (**OCT**) mode and converts the integer portion of the displayed number. You can enter positive octal numbers as large as 377777777. Numbers beyond this are interpreted as negative (2's complement) numbers.
-
- 3rd** [HEX] Selects hexadecimal (**DEC**) mode and converts the integer portion of the displayed number. You can enter positive hexadecimal numbers as large as 2540BE3FF. Numbers from FDABF41C01 through FFFFFFFFFF are interpreted as negative (2's complement) numbers.
- Note:** Hexadecimal numbers between 2540BE3FF and FDABF41C01 are equivalent to decimal values that are outside the range of the calculator and therefore cause an error.
-

Calculate 16+1 and display in each number mode.

16 + 1 =		17.
3rd [BIN]	BIN	10001
3rd [OCT]	OCT	21
3rd [HEX]	HEX	11
3rd [DEC]		17.

D C SIN^{-1} SIN	E g COS^{-1} COS	F me TAN^{-1} TAN
A h FRQ $1/x$	B NA $\overline{x}$ x^2	C R $\sigma x n-1$ $\sqrt{x}$

B and D are shown as uppercase letters on the keyboard, but displayed as lowercase **b** and **d**. If you enter ABCD, for example, the display shows **AbCd**.

To display the 2's complement of the number in the display, press $\boxed{+/-}$.

Boolean Logic Operations

You can perform logical AND, OR, XOR, XNOR, and NOT operations in the decimal, binary, octal, and hexadecimal modes.

Except for NOT, these functions compare the corresponding bits of two values. The result is displayed in the current number base.

Note: Although the TI-36X Solar does not display leading zeros for integers, logical operations treat each value as a 10-digit binary number. (A displayed value of 0, for example, is treated as 0000000000_{BIN}, and a displayed value of 1 is treated as 0000000001_{BIN}.) Keep this in mind if you see unexpected results.

AND	0 AND 0 = 0	0 AND 1 = 0	1 AND 1 = 1
OR	0 OR 0 = 0	0 OR 1 = 1	1 OR 1 = 1
XOR	0 XOR 0 = 0	0 XOR 1 = 1	1 XOR 1 = 0
XNOR	0 XNOR 0 = 1	0 XNOR 1 = 0	1 XNOR 1 = 1
NOT	NOT 0 = 1	NOT 1 = 0	

What is the binary result of 9F_{HEX} XOR 01_{HEX}?

3rd [HEX]	HEX	0
9F 3rd [XOR] 1 [=]	HEX	9E

Error Conditions

When **Error** appears in the display, the calculator will not accept a keyboard entry until you press $\boxed{\text{CE/C}}$ to clear the error condition. ($\boxed{\text{CE/C}} \boxed{\text{CE/C}}$ clears the condition and all pending operations.)

General errors

- Result larger than $\pm 9.999999999 \times 10^{99}$.
- Division by zero.
- More than 15 open parentheses or 4 pending operations (1 in **STAT**).
- Log, ln, or $1/x$ of 0.
- Log, ln, or $\sqrt{x}$ of $x < 0$.
- Even root of a negative number.
- 0 to the 0th power, or 0th root of any number.
- Rectangular to polar when x or y has an exponent > 63 .
- Tan of $x = 90^\circ, -90^\circ, 270^\circ, -270^\circ, 450^\circ$, etc.
- $\sin^{-1}$ or $\cos^{-1}$ of x where $|x| > 1$.
- $\tanh^{-1}$ of x where $|x| \geq 1$.
- $x!$ where x is not a positive integer ≤ 69 .
- Combinations or permutations when n and r are not positive integers.

Statistical errors

- Data value x such that $|x| \geq 1 \times 1.0\text{E}64$.
- Removing the only data value with $\boxed{2\text{nd}}$ $\boxed{[\Sigma-]}$.
- $\bar{x}$, $\bar{y}$, σ_{xn} , σ_{yn} , σ_{xn-1} , σ_{yn-1} , correlation, intercept, slope, x' , or y' with no data values or σ_{xn-1} with one data value.
- Correlation, intercept, slope, x' , or y' of a vertical line.
- Correlation or x' of a horizontal line.
- Correlation, slope, intercept, x' , or y' with only one data point.

Number mode errors

- Result outside range for that number mode.
- Selecting BIN, OCT, or HEX when displayed number is outside range for that number mode.

In Case of Difficulty

- If the display is blank, expose the solar panel to adequate light. Press $\boxed{\text{AC/ON}}$ and try again.
- Review the operating instructions.
