

INSTALLATION OF THE VMIACC-0129 P2 POWER ADAPTER FOR THE VMIVME-1128

The VMIACC-0129 is designed to be used in conjunction with the VMIVME-1128 digital input board. Use the following procedure to install the VMIACC-0129.

W A R N I N G

DO NOT PERFORM THIS PROCEDURE WITH POWER APPLIED.

PROCEDURE

1. Install the power (E1) and ground (E2) connections to the VMIACC-0129 using a minimum wire size of 12 AWG and ring lugs that are capable of handling the wire size chosen.
2. Install the VMIACC-0129 (power and ground connected) to the P2 connector on the backplane that has the VMIVME-1128 installed in that slot. Orient the VMIACC-0129 such that the a1 silk screen matches a1 on the backplane.
3. Power may be applied at this time for test of proper installation.
