

LEVELING

LaserBall 360™

SPECIFICATIONS

| | |
|-------------------------------|---|
| Dimensions: | 2.5 inches (64 mm) diameter |
| Weight: | 3.6 oz. (102 g) with batteries |
| Battery Type | Three L1154 (included) |
| Range | Typically up to 10 feet (3 m) |
| Accuracy | Typically within 1/4 inch (6.4 mm) at 10 feet (3 m) |
| Laser | U.S. and Canada: Type: diode Wavelength: 630-670 nm Power: <5 mW class IIIa Outside U.S. and Canada: Type: diode Wavelength: 630-670 nm Power: <5 mW class 2 |
| Operating Temperature: | 40°F to 120° (4°C to 49°C) |
| Storage Temperature: | 20°F to 150° (-7°C to 66°C) |
| Humidity: | 5% to 95% (non-condensing) |

Laser Level/Line Generator

LaserBall 360™ is a spherical, rotating laser that projects level or plumb lines on walls, floors, and ceilings.

No bigger than a tennis ball, it's so easy to use even a novice will experience instant success.

Just attach the mounting cup to almost any flat surface with the included non-marring, self-adhesive discs. Then place LaserBall in the cup, turn it on, and watch the internal LED glow a cool blue to indicate that the unit is on.

Rotate the ball to project either a horizontal or vertical line, as desired, and adjust the ball in its mounting cup to determine the length of the line.

It is the ideal tool for anyone who wants to hang pictures, shelves, cabinets, and other objects straight the first time.

- Projects a straight laser line in any direction along flat surfaces
- Easy-to-read bubble level ensures laser projects level and plumb lines
- Mounting cup temporarily fastens to wall for hands-free operation
- Internal blue LED illuminates bubble level for better visibility
