Single APV card detached to the readout board (fixed physically)

# Tracking results

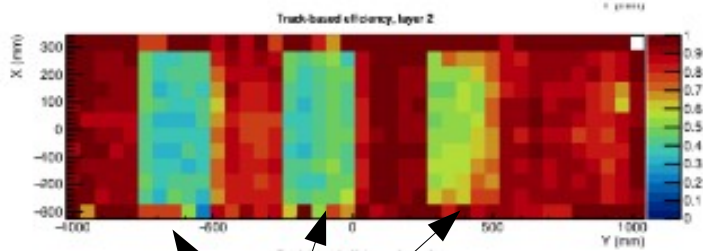

Did not see any connection issue (could have some noisy channels)

Nearly one 3<sup>rd</sup> channel are not connected

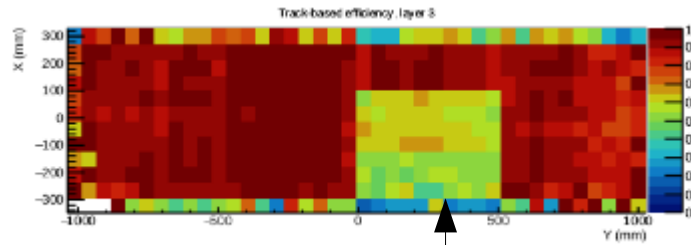

# MPD readout errors

Old plots

3<sup>rd</sup> Layer

4<sup>th</sup> Layer

Crate0 MPD14 (3\*5 slot)

(replaced about 2 month ago)

Collected nearly **8M cosmic events** since then

No readout errors

Crate1 MPD12 (12 slot)

(replaced yesterday)
