

Update on tritium absolute analysis (Misak's calculation)

Dien & Rey
09/18/2019

$8 < E_m < 40 \text{ MeV}$
 $P_m > 125 \text{ MeV}/c$

Studying Misak's $A=3(e,e'p)$ code

For every event in SIMC ^3He fast 3bbu kinematics root file:

- get SIMC calculated σ PWIA
- use event kinematics to calculate Misak σ PWIA
- Get the two into same units and compare them
