Issues

- For run 747 (E'=1.686GeV)& run 748(E'=1.585GeV), data to MC yield ratio is ~90%

➢Check other existing data with similar kin settings

➢Use MC model to generate a cross section table with same kin settings as the existing data

Compare cross section from Archive Data with MC model

Archive data: http://faculty.virginia.edu/qes-archive/data/12C.dat

Compare cross section calculated by Omar with MC model
