

# SBS GEM Commissioning Meeting

09/12/2019

Malinga and Anuruddha

- With the help of Bogdan, we finished the work of the two other counters and now they are installed in our cosmic setup. Now we have all the counters needed for the cosmic tests.
- LV power supply for layer #4, which was recently placed on the cosmic stand, was also installed. So now layer #2, #3 and #4 are ready for testing. (Layer #1 LV power supply will also be ready soon). Since the DAQ problems are still not 100% resolved yet, we couldn't test the cooling effectiveness of the fan/heat sinks.
- We started to put layer #5 together. The 4 GEM modules are on and we will start cabeling today.
